TESTIMONIAL FROM A FARMER WITH REGARD TO A MAJOR SOIL PRESERVATION INNOVATION

PRESENTACIÓN DEL TESTIMONIO

A farm with multiple crops requiring a high level of maintenance, lots of vehicle traffic and high-tech equipment.

The major constraint: frequent changes in inflation pressure between the road and the fields.

COMENTARIOS

Testimonio sobre las ventajas de los neumáticos VF VT-Tractor:

"Comfort and 10/15 minutes saved each time: by pushing one button the 4 wheels are inflated at the same time without having to get out of the tractor cab."

"Preserving the structure of the soil: with low pressure in the fields, the structure of the soil is protected, the slip ratio lowered and therefore fuel consumption reduced."

"Reduction in fuel consumption: with a low inflation pressure in the fields which reduces slip."
